"Pistachios are an excellent source of vitamin B6, copper, and manganese and a good source of protein, fiber, thiamine, and phosphorus. Scientific evidence suggests but does not prove that eating 1.5 ounces (42.5g) per day of most nuts, such as pistachios, as part of a diet low in saturated fat and cholesterol, may reduce the risk of heart disease." US Food and Drug Administration, July 2003

Have a great week!
