NOTICE IS HEREBY GIVEN that pursuant to Public Contract Code §20651.5, SISKIYOU JOINT COMMUNITY COLLEGE DISTRICT (“District”), acting by and through its Board of Trustees, will receive up to, but not later than the above-stated date and time, completed and executed Pre-Qualification Applications for general contractors to construct a work of improvement on College of the Siskiyous campus commonly referred to as the College of the Siskiyous Theater Arts and McCloud Hall Reconstruction (“Project”).

1. The District. The District was established in 1957 as part of the publicly funded California Community College system to provide higher education services through the College of the Siskiyous (“COS”). The COS campus is located in Weed, California at the base of majestic Mount Shasta (elevation 14,162 feet). The District and COS serve the economic, educational, lifelong-learning, and workforce needs of residents in Siskiyou County and the surrounding communities. COS seeks to inspire students by offering inclusive and practical learning experiences that are relevant in today’s global economy and environment.

COS offers associate degrees and certificate programs in the arts, athletics, humanities, sciences, mathematics and career/technical programs in a variety of subject matters, including business/computer science, EMS-Paramedic, fire-fighting, and welding. COS Students have access to academic counseling, academic assessment, library services and resources, career

counseling, personal counseling, financial aid assistance, Student Access Services (SAS), Extended Opportunity Programs and Services (EOPS), Student Support Services (SSS), textbook sales and buy backs, and tutoring services. Over the years, COS students have achieved success in music, drama, science, fire technology, nursing, and athletics.

COS is widely recognized for its excellent programs in the humanities and arts, the sciences and technology, and in athletics. Facilities at COS include the Theater Arts and McCloud Hall Buildings (which includes a 562-seat theater), gymnasium, and other sports facilities, a distance learning facility, spacious library, science complex, career and technical education labs, fire tower and tactical training center, and an emergency services training center in addition to general purpose classrooms.

2. Project. The Project generally consists of the reconstruction of the existing Theater Arts and McCloud Hall Buildings.

- 2.1. Theater Arts Building. The existing Theater Arts Building includes multiple accessibility challenges that the Project will address. The current accessible parking spaces are located on the northwest corner of the Theater Arts Building with a non-compliant path of travel and ramp access to the Theater Arts Building from the southwest corner. The Project will include adjacent site modifications to provide an additional accessible path of travel to the main Theater Arts Building entrance directly from the northwest parking spaces. The existing non-compliant ramp and path of travel will also be replaced to meet 2022 Building Code standards. Signs will also be provided to clearly direct users to the accessible route. Access to other perimeter entrances at the Theater Arts Building will be corrected to meet walkway slope allowances, door landing slope, swing clearances, threshold limits, etc.

Within the Theater Arts Building, the lobby and art gallery will be refreshed with new finishes, lighting, and upgraded restrooms. Marquees and signage will provide wayfinding and inform users of event schedules. These improvements and enhancements are expected to provide Theater patrons with an exceptional facility devoted to the performing arts.

Expansion of the restrooms in the Theater Arts Building must stay under the existing roof line to not trigger the requirement to add sprinklers per DSA. The plumbing vents for the restrooms must be one foot above the roof to meet code, which has inspired the two-tower design. As this location gets snow, the design of the towers must also consider how that snow is shed.

- 2.2. McCloud Hall. The Project scope at McCloud Hall will allow the outdoor Ceramics Lab to be more usable and comfortable for students and staff. By partially enclosing the existing canopy, the space can keep out unwanted winds and the upgraded kilns will provide students with advanced technology learning opportunities. Accessible upgrades at the corridor and restrooms are also being included at McCloud Hall. The canopy over the Exterior Ceramics Lab was never approved by DSA and will therefore be reviewed as a "non-conforming structure."
- 2.3. Estimated Construction Costs. The estimated Construction Costs of the Project is Twenty-Six Million Dollars (\$26,000,000). The estimate of Construction Costs is provided for reference only and for evaluation of Applicants' capability and capacity to complete construction of the Project.
- 2.4. Project Delivery; District Project Management. The District anticipates Project construction will be completed by a general contractor under contract to the District. The general contractor will be required to provide all labor, management, supervision, tools, materials

and equipment to complete Project construction in accordance with the Contract Documents issued by the District for the Project. District management of Project construction will be through the District's facilities department staff and a construction manager. The District anticipates that Trover Construction Project Management, LLC will provide construction management services during Project construction as an independent contractor to the District.

- 2.5. Design Documents; Design Professionals. Design Documents for the Project are completed and have been submitted to DSA for review. DSA approval is anticipated in the Fall, 2025. The District intends to issue the Notice Calling for Bids to the Pre-Qualified Applicants shortly after DSA approval of the Design Documents. The Design Documents submitted for DSA review may be accessed at: [DSA Submitted Design Documents](#). Design Documents available for review are for reference only. Design Documents are subject to revisions by the District and as required for DSA approval.

- 2.6. Project Documents. Project documents available for review are:
