

Subject: 3-31-21 All-College Updates!
Date: Wednesday, March 31, 2021 4:42:00 PM

Hello Siskiyous and Happy Manatee Appreciation Day!

This week's updates:

- **Suggestion Box:** We had three new suggestions this week:
 1. *Trans-Accessible Restrooms* – For privacy concerns, we are not able to convert all restrooms to gender neutral. However, we do have the following trans-accessible/gender neutral locations: 2 located upstairs in the New Science Building, one located in the Maintenance Shop, 2 located in the Student Center President's wing, one located in the Foundation building and one located in the Yreka RHSI building.
 2. *Administrative Process for Purchase Vouchers* – Administrative Services is working to automate this process. An update will be provided when ready!
 3. *The need for strategic hiring discussion* – Thank you for this comment. We are interested in hearing your re-organization recommendations and, we hope individuals will be open to sharing these recommendations at our 2nd Town Hall meeting scheduled on May 28, 2021 (Flex Day).
- **Mandatory Flex Day:** Our mandatory flex day has been rescheduled to Friday, May 28th from 8:30a – 12:00p. The Flex Committee is meeting this week to confirm the schedule. Once confirmed, the agenda as well as Outlook invites with Zoom links will be emailed.
- **Name that Pathway!:** In last year's Guided Pathways workshops, we were able to identify potential categories and pathways. Now it's time to get student feedback! Please encourage your students to complete this short 'Name our Categories and Pathway Program' [survey](#).
- **Friday, April 2nd:** Reminder, we will have our All-College meeting at 8:30a (you won't want to miss it!), the IPB Instruction Open Hearing at 9:30a and, our 2nd vaccine inoculation clinic (keep an eye on your email for updated information/reminders).
- **Summer/Fall 2021 Schedules:** Our Summer schedule is now live! Fall should be live the 2nd week of April.

Fun Manatee facts:

- Belonging to the scientific order, Sirenia, they are also related to the dugong.
- Manatees are related to the elephant.
- Due to their immense size, they graze up to 8 hours a day.
- Manatees continually replace their teeth. A new set is always growing behind the current set of teeth.
