

# **How to Pair Bluetooth Noise Canceling Headphones to a Device**

This guide is for the Skullcandy Crusher Wireless headphones, but this guide may also be used as a reference for other Bluetooth Headphones as well.

## **Putting Headphones in Pairing mode:**

Press and hold the circular raised button for 3 seconds until you see the LED light flashing. This light suggests that the headphones are now in pairing mode.

## **Find Your Skullcandy Crusher headphones:**

The next step is to find your headphones on your cellphone or computer device.

### **For Android:**

- Go to settings and then tap Connections,
- In Connections window, press Bluetooth,
- Under ‘Available devices’, when your Skullcandy device appears, tap on it and then your Android device will be connected to your headphones,

### **For iPhone:**

- Tap Settings and then press Bluetooth. Turn on Bluetooth.
- Search for your Skullcandy device listed under “OTHER DEVICES” and then press on it to connect,

### **For MacOS:**

- On your Mac, tap Apple menu > System Preferences,
- Click on Bluetooth,

- Select your Skullcandy device from the list,
- Click Connect,
- If asked, tap Accept.

**For Windows 10:**

- Search for “Bluetooth” in your Windows search box,
- Once the Bluetooth & other devices window pops up, ensure Bluetooth is “on”,
- Tap “Add Bluetooth or other device” and then select your device from the list.

If the pairing is good-to-go, the LED will stop blinking. You will also hear an audio verification that your device is connected.
