

The **Vision Resource Center** is a platform for connection and collaboration designed by and for the California Community Colleges.

Faculty and staff can access **professional development resources** to help achieve the goals and commitments outlined in the Vision for Success.

Connect

Connect with your campus and statewide colleagues in online communities to collaborate and share ideas and resources. Communities also help further connect the Chancellor's Office with colleges across the state, contributing to a stronger mutual understanding.

Learn

Access learning modules designed to support major California Community Colleges initiatives. Courses and materials from Lynda.com and Skillsoft are also available to enhance colleges' professional development offerings.

Plan

A systemwide calendar of events will help you stay informed about upcoming workshops and trainings such as those related to the Student Centered Funding Formula and Guided Pathways.

College Integration

Colleges or districts have the option to fully integrate the Vision Resource Center, expanding their local controls. For instance, colleges or districts would have a customizable welcome screen and be able to create their own local communities.
