Hello Siskiyous and Happy National Cheddar Day!

According to [daysoftheyear.com](http://daysoftheyear.com), cheddar was discovered after a woman, who resided in Cheddar located in Somerset England, placed a pail of milk in a cave to keep it cool. The woman, forgetting about the pail of milk, finally returned and discovered that it had turned into a delicious, hardened cheese!.....I don't know about you but, I don't think I would eat hardened milk out of a pail that had been sitting in a cave for several days...that's just me though.

On to.....
