Hello Siskiyou and Happy International Mountain Day!

This year's theme is 'Restoring Mountain Ecosystems'. Did you know that:

- Of the 20 plant species that supply 80% of the world's food, six originated and have been diversified in mountains: maize, potatoes, barley, sorghum, tomatoes, and apples
- Mountain ecosystems are under threat from pollution. Microplastics have even been found as high as the summit of Mt. Everest.
- Up to 84 percent of endemic mountain species are at risk of extinction, according to the Intergovernmental Panel on Climate Change.

This week's updates:

- **Enrollment Report:** Winter and Spring 2024 reports can be accessed [here](#).
- **Facilities & Maintenance Updates:** The new freezer is being delivered to the kitchen today. A small amount of repair work will take place inside the kitchen this week starting on Friday 15th through Tuesday December 19th. Waiting on a construction schedule for the temporary vaporizer installation. No construction on the Yreka campus.
- **Suggestion Box:** No new suggestions/comments since last week.
- **Possible Amazon Hack:** If you shop via Amazon, you might want to check your address book for any unknown addresses. I was notified by a friend that Amazon Hub addresses may have been added to accounts. I checked mine today and found two unknown Amazon Hub addresses and immediately deleted them.

In my absence from Jan 1 - 10, 2024, VP Fields will serve as acting President.

This week, I will be taking Thursday and Friday off to take care of personal business. In my absence, VP Walton will serve as acting President.

For those who are either off contract or on vacation after finals week, I wish you a very Happy Holiday Season and a fantastic start to the New Year! I feel extremely privileged to be working alongside such talented individuals. Thank you for everything you do!
